DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the ***"a periodic waveform and having a frequency correlated with a size of said graphical object interacted with said cursor" and "a periodic waveform and having a longer duration and lower magnitude than said pop sensation"*** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claim 11-18 are recites the limitation ***"said graphical object"*** in claim 11, line 5. There is insufficient antecedent basis for this limitation in the claim.

Claims 12-18 are rejected since they depend on rejected claim 11.

Allowable Subject Matter

3. Claims 1-10, 19-27 are allowed.

4. Claims 11-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

5. The following is an examiner's statement of reasons for allowance: the prior arts has failed to teach the recited claim invention ***"enabling the output of a tactile sensation"***

Art Unit: 2673

during said, said tactile sensation being based on a periodic waveform and having a frequency correlated with a size of said graphical object interacted with said cursor"; "causing the cursor to snap to said graphical object when said cursor is within a predetermined distance of said graphical object in said graphical environment so that said cursor is displayed touching said graphical object and said cursor can be moved along or within said graphical object based on user manipulation of said haptic feedback device; and enabling the output of a vibration sensation to the user while said cursor is moved along or within said graphical object"; and "enabling the output of a pop sensation, said pop sensation being a short, high magnitude sensation; and enabling the output of a ringing sensation during or immediately after said output of said pop sensation, said ringing sensation being commanded using a periodic waveform and having a longer duration and lower magnitude than said pop sensation".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
